NEW DESIGN

Beyond Design

Black GT 95 is a 95-metre superyacht with a 12-metre beam created by Beyond Design in the inimitable visionary, yet supremely seaworthy, style of innovative Indian designer Ashish Gupta. Very much breaking with all the usual traditional mores, this powerboat strives to achieve a new balance between absolutely cutting-edge technology and improved onboard liveability through the creation of extra large, thoroughly spectacular spaces. Luxury isn't confined to the furnishings, but is integrated into the design of the entire structure, mixing and melding the spaces: the saloon, for instance, can be experienced as an indoor swimming pool and the suite as a 360-degree panoramic terrace. The exterior profiles are majestic, almost militaristic, but inside there is a rarefied atmosphere. Its light weight and sheer power mean that this megayacht gallops along at over 40 knots.
